

Shubham Yadav

shubhamyadav200995@gmail.com | +91-7973142543 | Noida

PROFILE SUMMARY

Full Stack Developer with 6+ years of experience building scalable, high-performance applications using React.js, Node.js, PostgreSQL, and AWS. Strong in system design, API architecture, microservices, and cloud deployment. Worked onsite in Japan handling requirement gathering, client communication, and solution delivery. Skilled in performance optimization and modern AI integrations using LangChain, RAG, and OpenAI APIs.

EXPERIENCE

Tata Consultancy Services, Fullstack Developer

08/2022 – Present | Noida

- Built and improved 15+ React and Node.js applications, making pages load 30-40% faster through better coding, caching, and component updates.
- Designed and maintained scalable REST APIs, reducing backend response time by up to 45% through optimized queries and efficient data handling.
- Worked onsite in Japan for requirement discussions and client coordination, helping improve delivery efficiency by 20%.
- Managed Agile sprints and collaborated with cross-functional teams, achieving a 95% on-time delivery rate.
- Worked on code refactoring and modularization, making features easier to maintain and reducing development time for new modules.
- Integrated third-party APIs and internal services, ensuring smooth communication between multiple systems.
- Performed code reviews and provided feedback to team members, raising overall code quality.
- Contributed to UI/UX improvements, fixing layout issues, responsiveness gaps, and improving user experience.
- Supported production deployments, handled debugging, and provided fixes for critical incidents under tight timelines.

Sunfocus Solutions Pvt Ltd, Fullstack Developer

01/2021 – 08/2022 | Mohali

- Developed full-stack features using React.js and Node.js, improving UI performance by ~30%.
- Built and deployed AWS Lambda functions, reducing infrastructure cost by 25% and improving scalability.
- Improved frontend performance by reducing bundle size, splitting components, and optimizing rendering cycles.
- Increased API reliability by implementing validation, error handling, and standardizing API contracts.
- Worked on database design using PostgreSQL and MySQL, improving query performance and overall efficiency.
- Integrated third-party APIs including authentication, payments, and notification services.
- Collaborated closely with UI/UX teams to ensure pixel-perfect frontend implementation.
- Participated in sprint planning, estimation, and daily standups, ensuring smooth workflow under Agile development.
- Provided technical support for production issues, identifying root causes and implementing quick fixes.

Live Deftsoft Pvt Ltd, Backend Developer

04/2019 – 01/2021 | Mohali

- Created 20+ REST APIs with fast response times (under 200ms), improving overall application performance.
- Cleaned and reorganized Node.js modules, reducing code complexity by 30% and improving scalability.
- Built admin dashboards with role-based access, improving reporting and internal operations by 40%.
- Tuned SQL queries and indexing, reducing database load by 25%.

PROJECTS

Sales Monitoring Portal, (ReactJs, NodeJs, PostgreSQL, AWS)

09/2024 – Present

Built a real-time sales analytics dashboard for medical representatives.

- Designed scalable backend APIs and optimized data queries, reducing report generation time by 35%.
- Implemented dynamic charts and doctor targeting logic using React.js, improving sales team efficiency.
- Built secure data workflows using PostgreSQL and AWS infrastructure.

Doctor Video Conference Platform, (ReactJs, NodeJs, PostgreSQL)

08/2022 – 08/2024

A virtual meeting and scheduling system for medical events.

- Implemented video session scheduling, speaker management, and secure access workflows.
- Built backend modules handling meetings, roles, and session tokens.
- Optimized database operations and increased session reliability.

Family Tree Android Application, (Express.js, Node.js, PostgreSQL)

01/2021 – 07/2022

Backend system for creating family structures, uploading memories, and enabling timeline-based viewing.

- Built 20+ REST APIs for user accounts, relationships, and media uploads.
- Improved media handling performance and ensured efficient data modeling.
- Delivered a scalable architecture for thousands of user records.

AI Document Assistant, (LangChain.js, OpenAI, ChromaDB)

03/2025 – 08/2025

- Built a RAG-based AI assistant that answers queries from documents using vector search & embeddings.
- Implemented PDF ingestion pipeline, text chunking, and semantic retrieval.
- Integrated with Node.js backend and React frontend for a smooth user experience.

SKILLS

Frontend: React.js Redux TypeScript JavaScript (ES6+) Next.js HTML5 CSS3

Backend: Node.js Express.js REST APIs Microservices MVC Architecture Authentication & Authorization (JWT/OAuth)

Cloud & DevOps: AWS (Lambda, EC2, S3, CloudFront, RDS) Serverless Architecture Docker CI/CD (GitHub Actions)

Databases: PostgreSQL MySQL SQLite MongoDB DynamoDB Query Optimization Database Schema Design

AI / LLM Technologies: LangChain.js OpenAI API RAG (Retrieval-Augmented Generation) ChromaDB

EDUCATION

Bachelor of Technology, Punjab Technical University

07/2013 – 06/2017

GPA:6.7
